Bow Island

We all like to hear of our own Home Team winning and it keeps up the enthusiasm for your Club in your Home Town when they read how you won and it helps to Boost your Club. Every team that Wins a game should send in a good Report of the Game to the Bow Island Review which will publish it in full, free of charge. See the Schedule of the Base Ball League on Middle Page

The Comet

Pons Winnicke

During the last week of this month of June, look up at the sky and see one of the vast wonders of nature. In the form of a huge Comet called Pons Winnicke, its tail (which is about two million miles long) will strike the Earth with great force throwing thousands of sparks like "shooting Stars" somewhere about the 27th. of June.

This huge Comet is shaped something like an eel or a snake, and was first discovered by Monsieur Pons a Frenchman on 12th. June 1819, and it is travelling towards the United States at the terrific speed of 32,000 miles an hour or 1,280,000 miles a day. by the 27th. June it will reach a point in the skies about 2 million miles from the Earth.

This will be sufficiently close for the tail to side-slip our old "Mother Earth" and it will show whether it is made of harmless or damaging material.

In several days before the 27th. June, this Comet's brilliant tail will be observable from all parts of the country.

Only once in your lifetime will you see anything like it, it is an education, so don't fail to look up daily at the skies from now on and see a sight to set you deep thinking on the "wonders of the Eternal God!"

Mrs. L. Salmonson left on last Monday morning's train for Vancouver, B.C. where she will visit one of her daughters who will be away for most of the summer.

Mr. and Mrs. J. L. McArthur and little daughter Mary were business visitors to Town last Saturday

A New Novel Story

Fascinating Story

will appear next week

"Oh, Money! Money!" is a new novel by Eleanor H. Porter, will be commenced as a serial story in next issue of this paper. Eleanor Porter is well-known as the author of the Pollyanna Books, "The Road to Understanding" and "Jude David." "Oh, Money! Money!" is a splendidly constructed story and full of appealing character study.

It is considered by many the best book that Mrs. Porter has ever written. It is a story delightful in every way. Do not miss the opening chapters of this serial. If not already a subscriber to this paper, send along your subscription now, so that you may receive the paper containing the first instalment.

We regret to report that Mr. R. H. Reams was taken ill last Thursday night and on Friday was taken to Lethbridge Hospital for an X Ray Examination, he was accompanied by Mrs. Robertson. They returned on Wednesday last and Mr. Robertson is feeling somewhat better.

Ed. Reams is leaving this week by auto for Southern Oregon on a visit to his brother-in-law Mr. Babke, he will travel by way of Fernie, B.C.

It would be a good idea for the U.E. Locals and also individual Farmers in these Districts to write or wire to Hatfield that "this part of the Circle in his Contract," is not getting Rain and the Crops are suffering although there have been lots of heavy Rain clouds around here and to ask him to deal Fairly with this part of his Contract.

"It is not getting Rain and the Crops are suffering although

there have been lots of heavy Rain clouds around here and to ask him to deal Fairly with this part of his Contract."

"It is not getting Rain and the Crops are suffering although

there have been lots of heavy Rain clouds around here and to ask him to deal Fairly with this part of his Contract."

"It is not getting Rain and the Crops are suffering although

there have been lots of heavy Rain clouds around here and to ask him to deal Fairly with this part of his Contract."

Stop the Wasted Effort

Compared with most countries, Canada has been free from serious industrial disturbances resulting in strikes and lockouts. In this respect, indeed, the Dominion has been most fortunate, and it is not only a matter for pride, but also a source of concern, the sanguine, common-sense and general goodwill prevailing in this country, are an indication of the fair-mindedness of both employer and employee.

Recently, however, the printers of Regina were on strike to enforce compliance with certain demands made by them and which the employing printers felt constrained to refuse to grant in view of present business conditions, and the demands in view of the cost of living. A 44-hour week should be adopted but that the old scale of pay for 48 hours work should be continued. Other demands were for the adoption of certain restrictive shop-rules which would have the effect of decreasing production.

One such rule was a further extension of a very vicious rule already in force, which requires the employer to bear the burden of all expenses, not on the employees, but on the general public. It is a rule which makes a demand for the doing of positive and absolutely waste work. To explain: if a merchant inserts an advertisement in a paper and at the same time orders, say 500 or 1,000 copies run off as a poster, the Union rules prohibit the use of the same type for the double purpose. In other words, the identical job would be set up in type twice, while once would, save the expense of paper. The printer would be paid for the double work for it. The Union is laboring under the crazy delusion that they are thereby creating work for printers and providing employment for a larger number of men. They forget that as the workers constitute the great bulk of the buying public they themselves are forced to pay for this waste.

As a matter of fact, the printers are not creating more work and providing more employment, because by reason of the increased and unnecessary cost of work there is less done.

Any process of labor which does not produce something of value is economic waste, pure and simple. The production of something for use is the only way to increase wealth, and it is only through the increasing of wealth that the welfare of society can be increased.

That is to say, wealth is produced.

There may be prospective wealth, enormous potential wealth,

but until labor is brought to bear and that natural wealth is converted into the things men require.

And men's energies are devoted to work which

gives them nothing, they are not merely waste and serve no

no good purpose, then the source of wealth must not interfere with the

creation of wealth, the whole world suffers, but most of all the workers themselves.

The workers of the world need to learn the lesson that the first re-

quest for the payment of the good wages they demand, and have a right to

wages, is that the workers make enough money to be able to pay good

wages. Wealth is created by labor, and whatever interferes with the creation of wealth interferes with the dis-

tribution of wealth in wages as well as in profit. When Union rules inter-

fer with the creation of wealth they interfere with the welfare of labor

as much as they interfere with the welfare of capital.

As a matter of fact, they interfere with the welfare of labor a great deal more than they interfere with the welfare of capital, because about

ninety per cent. of the wealth created is distributed in wages, and is well

content with anything like ten per cent. of the wealth created.

It should, therefore, be the intelligent purpose of the labor unions to

meet any depressed situation in business by increasing productivity and profits.

Whenever labor, by restrictive rules, or caps by curtailing produc-

tive efforts, interferes with the creation of wealth, it interferes with the distribution of wealth in wages as well as in profit.

When Union rules interfere with the creation of wealth they interfere with the welfare of labor as much as they interfere with the welfare of capital.

There are, says an American writer, two fundamental facts to be recog-

nized: First, that productivity is necessary for permanency high wages;

and, second, that high wages are essential to general prosperity. The less

the workers interfere with the creation of wealth the less is there to be distributed in profits and wages.

That is reasonably obvious.

And since the vast majority of the people of this or any other country are wage-earners, and general prosperity depends upon the prosperity of the mass, it is equally obvious that only liberal wages will create general prosperity for the general purchasing power, which, in turn, means the prosperity of every individual and of every individual business.

Therefore, let there be good wages paid for good work, and let good

work—really productive work—be given good wages.

Nurses May Get Land

Residents of Canada Who Served Overseas Are Eligible.

In view of the Soldier Settlement Act adopted by the Canadian House of Commons, a clause declaring that nurses who were resident in Canada before the war and who served overseas shall be eligible to qualify for land settlement.

A Substitute.

Life in Mexico being rather monotonous since General Villa's retirement, the long extinct volcanoes at Colima has resumed action and is belching smoke and ashes like a regular Vesuvius—Vancouver Province.

Our slogan for the coming year should be, "Buy at Home." Add to your own and your neighbor's prosperity by keeping the money circulating in our own district.

Ranch Brings Big Rental

\$1,000 For Ten Acres Does Not Include House.

What is believed to be the highest rental ever paid for a ranch property in the Cypress Hills has been agreed upon by the owner and lessee.

The nice ranch, which has been taken for one year at a rental of \$1,000 for ten acres.

This does not include the use of the house.

The place is planted entirely to trees and small fruit.

Children suffering from worms soon show the symptoms, and any mother can detect the presence of these parasites in the children's intestines and rectum. Until recently, parents cleaned their, the child cannot eat, he cannot sleep, and Millie's Worm Powders are unique and effective only for the eradication of worms, but the children are run down in consequence.

Ask for Minard and take no other.

"Suck Me to Sleep."

A French scientist claims to have

machined a machine which will produce sleep by means of an electric current from tiny batteries fixed on the wrist and instep. The current relaxes the nerves, and quickly produces a sensation of peace and rest.

It is claimed to be the cure of habitual sufferers from insomnia.

As a veritable and effective respi-

rator, HALL'S CATARACT OIL is an tonic and emollient.

It is a liniment and salve, and can be applied to the eyes.

Trials Of War Criminals Causes Great Dejection Among German Military

London.—Sir Ernest Pollock, the solicitor-general, replying in the House of Commons to a question by Hon. Mr. Thompson, asked if he knew whether Sir Ernest was satisfied with the results thus far of the trials of the war criminals in Leipzig, said it would be improper to make a statement. He added, however, "Perhaps Mr. Thompson will be glad to know that a sentence delivered in my presence caused great objection among the military part of Germany, and that the officers there certainly did not think it a small sentence to impose upon their members in the ordinary prison in order to carry out a sentence of ten months among thieves and felons."

Referring to one of the accused who had chosen to remain in a capital ship and fled from Germany as soon as the list of accused men was published, the Solicitor-General said, every effort was being made to arrest the man and his property has been sequestered.

The German officer to whom Sir Ernest referred as having been sent to the ordinary prison was Sergt. Heyne, who was sentenced to ten months' imprisonment May 20 for his conduct in 1917. The prisoners were prisoners of war in the prison camp in Herne, Westphalia.

Admiral Sims

Stands By Statement

Sees Nothing Un-American in Speech About Sinn Fein.

London.—Admiral William S. Sims, U.S.N., is quoted by the Press Association as saying with regard to the speech he delivered on the Irish question: "I might as well say a word of it. I shall repeat a single word, and I see nothing un-American in it."

Admiral Sims, who said he had not received the telegram reported to have been sent to him by Harry of the Navy Dept., implying it the admiral was *correctly quoted* in the press reports of his speech, has arranged to have the cable message delivered to him as soon as it reaches London.

Speaking at a luncheon given by the English-speaking Union at London recently, Admiral Sims dealt frankly with Sinn Fein problems. It was suggested that he should be asked to declare that the persons he assailed were United States citizens "when they want money, but Sinn Feiners when on the platform," and added: "They are making us on America today."

Toronto Project Begun.

Lethbridge—The work on the Lethbridge Northern Irrigation Dam project will be in full swing in a week and the big steam shovels will be moving dirt in a fortnight. Grant Smith and Company, McDonald, Linton and Company, and the local workmen, have sub-contracted for 1,500,000 feet with Nochran and Manias, Calgary.

Strong Plea Is Made For Peace Of The World

President Harding Speaks of High Ideals of Canada and the United States, Following Address of Hon. N. W. Rowell.

Washington.—President Harding delivered a commencement address at the American University here, found the subject of world peace occupying so prominent a place on the programme that he was prompted to depart from his prepared manuscript and speak on the subject of the peace by sovereign states without the interference of a world "superpower."

The President's remarks followed an address by Hon. N. W. Rowell, of Canada, who advocated the same continental North America could make to civilization was "for men on this side of the water to stand behind the movement for peaceful settlement of international disputes."

"It do not seem to me that the occasion," said the President, "without giving assent to many of the appropriate and appealing things just uttered by Mr. Rowell. I liked his emphasis on the Canadian and Canadian ideals in common and when he spoke about the North American contribution to present day civilization and to the world, it occurred to me that the example of the two great people living side by side in peace, in

Saskatchewan Elections

Martin Government Is Returned by Heavy Majority.

Regina.—The heaviest vote in the history of Saskatchewan was recorded in the recent provincial elections. More than 100,000 ballots were cast in the election, which resulted in a Martin government, consisting of 41 Conservatives, 41 Independents, 11 Conservatives 2, Labor 1, and doubtful seats 5.

The following Government candidates were elected:

Hon. W. M. Martin, Regina; R. Douglas, Colington; W. G. Robinson, Francis; E. R. Ketcheson, Hawley; J. Y. Vanier, Lumsden; H. C. Young, Lumsden; G. G. Johnston, Melville; J. A. Smith, Pleasant Hill; W. J. Pater, Rosemont; F. C. Clinch, Shellbrook; T. E. Gamble, Brangwyn; W. H. Dodds, Canora; J. A. Dowd, Estevan; K. V. Kinman, Wadena; W. H. Harvey, Kindersley; J. E. Salkeld, Moose Jaw; Thos. Raymond, Biggar; D. J. Sykes, Swift Current; S. Bingham, Wilkie; G. Bennett, Wolfley; Geo. W. Robertson, Weyburn; J. F. Warren, Yorkton; W. H. Williams, Vanscoy; and J. E. Salkeld, Moose Jaw City; J. B. Gordon, Souris.

HON AND DEARIE**ADDITIONAL
BOW ISLAND**

The L.O.A.A. Lodge No. 309 was installed here on Friday night last Provincial Grand Organist Mrs. Mrs. D. Letters of Calgary conducting the initiation. The following officers were installed:

Mrs. A.E. Werts - W.M.
T.R. Blaine - D.M.
J. Pollitt - Chaplin
Mounds - Rec. Secy.
Landsdale - Fin. Secy.
Thurston - Treasurer
Still - Lecturer
Calder - Dep. Secy.
Hurlbut - D. of C.
Knox - I.O.G.
J.E. Still - O.G.

After the installation a splendid repast supplied by the old members was greatly enjoyed by all. There were several short addresses by members and a hearty vote of thanks were tendered Mrs. Lette for the very able way in which she had conducted the various parts.

Mr. C.F. Young of London, England who came over this spring and has been assisting R.J. Emerson and H. Waterson with farm operations left last week, this is Mr. Young's first visit to Canada and he is well pleased with the country but would like to see a little more rain, he has gone to look for a location to start a dairy. Mr. Young is a good fellow having served his time at the front. We regret there is not an opening here.

Mr. and Mrs. Scott and two boys of Preston visited their daughter Mrs. R. J. Emerson here last Sunday, they report some good crops in that district but in bad need of rain. Hatfield get busy.

**U.F.A. and U.F.W.A.
have a successful
evening**

A very entertaining evening was spent with a fine concert added which was held by the U.F.A. on the 9th June.

Progressive Whist first part of the evening.

Ladies first prize going to Mrs. Thompson.

Gen. first, going to Mr. W.R. DePew.

Consultation prizes to Mrs. Whitfield and W.H. Bell.

The following program was then given. W. A. Bateman acting as Chairman

Mrs. A. Ostrom is visiting in Calgary

Mr. A.L. Posey of Seven Persons was a visitor on business last Saturday

Opening Ceremonies - Equal rights to all by the Junior U.F.A.

Mrs. A.C. Gage - Recitation

Mr. Geo. Calder - Bagpipe solo

Mr. W. Gees Reading from "Drummond"

Mrs. Arlithmott - Comic Songs

M. Foss - Solo Baritone

Mrs. Kirk - Piano

A dainty lunch was served by the ladies after the program.

The Cross Line Orchestra furnishing our usual splendid music.

Mrs. Bateman gave a clear and very interesting address on the "Aims and Ideas" of the U.F.A. which was listened to with great pleasure by all the thoughtful and earnest members of the organization.

Mrs. Arlithmott, as usual, carried her audience completely away with her fine rendering of all the songs she sang with so much feeling — her superb voice is the delight of all lovers of music.

Mrs. Kirk is a brilliant Pianist, her touch and technique compels admiration and a longing that we shall often hear her again.

Mrs. Potter and Mrs. Hudson of Winnifred were business visitors here last Friday and guests of Mrs. Emerson.

Mr. and Mrs. F.J. Henderson are attending the picnic in connection with the turning of the first sod on the construction of the Lethbridge Northern Irrigation system at Mr. Saunders' Camp, Albion Ridge.

Mr. A.W. Fuller is spending a few days in Burdett.

Mr. A.J. Whitney of Lethbridge spent the week end with his sister Mrs. F.J. Henderson.

Mrs. A. Ostrom is visiting in Calgary

Mr. A.L. Posey of Seven Persons was a visitor on business last Saturday

Forster predicts rains for latter part of the month, hope it is right.

The Weather

June 1921

Friday 10th. Hot, some rain during night.

Saturday 11th. Cloudy

Sunday 12th. Sunny

Monday 13th. Cloudy. Hot High Wind.

Tuesday 14th. Cloudy

Wednesday 15th. Cloudy, good rain during night

Thursday 16th. Rain

Grassy Lake

From our own Correspondent

The little daughter of H. Pleckinger died at the Medicine Hat Hospital last Friday the 10th, and was buried in Grassy Lake Cemetery on Saturday.

The funeral service was held at the Presbyterian Church and was conducted by the Rev. Mr. Lawrence

THERE WAS NOBODY HOME**Grassy Lake****WINNIFRED**

Mrs. Chas. Scott has finished her Red Cross Drive which was very successful, the following statement in connection will be of great interest to those who contributed to so worthy a cause:

For Membership \$84.00
Juvenile Membership \$12.00

Donations \$881.25 making a total of \$477.25, of this sum \$350.00 was donated by the Municipal District of Eureka No. 65.

Great credit is due to Mrs. Scott, as the subscription work was entirely due to her efforts, and the Red Cross is to be congratulated on having such an energetic worker.

John Phillips who resided a few miles south of Grassy Lake died on Friday the 10th, at his home and the funeral service was conducted by the Rev. Mr. Lawrence at the home of Mrs. Phillips on Sunday 12th, and the remains were laid to rest in the Grassy Lake Cemetery. Mr. Phillips was one of the old timers residing here having located in Grassy Lake district in 1906, owing to ill health for a number of years he had been unable to get around very much, he was very highly respected and the sympathy of the entire community is extended to the family.

The Ladies Aid will hold a business meeting June 23rd, in the Globe Room and their next meeting place will be at the home of Mrs. Alex Smith July 5th.

Mr. Cairns of Bow Island made several professional calls here last week.

Mr. John McLeod bought the lot owned by Mr. Munro and is preparing the cellar to move his building on to lots this month.

BALL

Winnifred Juniors' Base Ball team played Whitehaile Nine, to the tune of 10 to 5 in favor of Whitehaile on June 9th.

Local Team Trims Winnifred

Bow Island ball team took Winnifred into camp on Wednesday evening at the laters grounds by a score of 8 to 4. The game was evenly contested on both sides, Nevers and Knock occupied the mound for the locals and Denison and Holder for Winnifred. Roy Beattie umpired the game. The detailed score is as follows:

R. H. E.
Bow Island 000000132 8 6
Winnifred 01002000 4 3 6

Bow Island plays at Foremost to-day Friday

Official Standing of the Rainbelt Base-Ball League as at 14th. June 1921

	won	lost	Per cent
Burdett	1	0	100
Foremost	2	0	100
Winnifred	2	1	.666
Grassy Lake	1	1	.500
Bow Island	0	2	.000

"Roster"

Two reasons for Bow Islanders to be happy today are the facts that whether Mr. Hatfield is working or not we received a nice rain for which everybody is thankful and secondly the Bow Island Base Ball Club won a first class game of Base Ball from their strong opponents the Winnifred Base Ball Club.

From a spectator's point of view the game was all that could be desired,

full of thrills and spectacular plays

and our boys did themselves proud.

Our good Doctor remarked

big League Ball had nothing on

this game.

A word to the boys about the next

Two or three games to be played.

The ability is there, but remember

that you have to be on your toes all

the time and keep fighting hard, and

you'll win Ball Games.

"Good Luck to both and may the

Best Team Win."

We are looking for You—so do Come

Born to Rev. and Mrs. Rogers Sunday 12th, a bouncing big boy

Hog Tight Fences

(National Crop Improvement Service)

"A hog naturally is as clean as a dog or horse. While he loves to wallow when dies are bad and even does this when he is healthy, he always keeps himself clean and will bathe in clean water the same as any other animal," says Mr. R. S. Rider, president, Canadian Steel & Wire Co.

The hog farmer who is in the hog business, knows that it does not pay to be chambermaid to a hog any more than it does to be chambermaid to a dog in order to be healthy, should harvest his own crops.

The Ladies Aid will hold a business meeting June 23rd, in the Globe Room and their next meeting place will be at the home of Mrs. Alex Smith July 5th.

Marconi Visualizes Results Of Wireless Control On Future Naval Warfare

"The country with the most efficient directional wireless is bound to win the next war. The rapidity with which experiments are succeeding in England shows this picture; wireless control will surely result in a revolution in modern ideas of naval warfare."

"I had in mind a gigantic clash between two manless navies in mid-ocean, directed by unseen hands on the land or in the air."

"The wireless, efficiently directed navy is bound to drive the weaker navy from the seas and then the seaboard and bases of the latter will be entirely at the mercy of the strongest."

Thus Senator Guglielmo Marconi, who has just returned from a two months' tour in the Mediterranean, on his first visit to that continent, sees possibilities of this newest arm of the marvellous wireless achievements.

"The possibilities along the line are so great that even I am afraid to say too much. No one knows its limit. Already we have learned a good deal about what the future may bring. Experiments in England in directional wireless are already successful in the embryonic stages, and are being so improved and becoming so much more efficient that daily there are new surprises."

"I understand that America is so impressed that the greater part of the summer naval manoeuvres will be devoted to furthering its knowledge of this most important development by using wireless, dreadnoughts controlled by wireless as targets for attacks from the air."

"It can readily be seen if one ship can be controlled in this manner the future manless navies are simply a matter of time and development."

"If a war ever comes with this, it is perfectly clear it will be more terrible than ever."

Marconi visualized monster battleships patrolling seas, controlled by master minds in command posts thousands of feet above the surface of the air. His description of what would happen if two of these navies of equal size should meet, automatically discharging their batteries of torpedo torpedoes, putts July 1st and H. G. Wells.

Now that the position of a ship even two or three thousand miles distant is easily ascertainable by land wireless, "what?" Marconi exclaims. "What is the possibility of a giant submarine, bigger than the largest submarine, with a radius of thousands of miles and containing tons of explosive?"

"It will be easy to discover this monster submarine, and once through the ocean until a target is found. It would be worth while wasting many of these if one succeeds in destroying an enemy dreadnought," said Marconi.

The inventors characterized the whole field of wireless research as a fertile field for horrible development, saying:

"At every stage of progress we are finding new and unexpected possibilities, such, for instance, as the firing of batteries of guns on land and sea by wireless waves."

"Of course, every sort of possibility exists—communications and mysterious electric force in the air may be harnessed by defensive as well as offensive purposes in war time."

Canada's Healthy Livestock

Report of Last Two Years Is Highly Satisfactory.

The report of the Veterinary Director-General recently issued covers two years, the first part for the year ending March 31, 1919, and the second part for the year ending March 31, 1920.

The health of Canada's livestock during both years is shown to have been highly satisfactory. In fact it is easy to believe that Canada, the only country in the world for all breeds of cattle, can truly claim to be absolutely free from ailments in its cattle, horses, sheep and swine any more than it can that every human being is healthily free.

On the other hand, the ideal state that any other land. None of the epizootic diseases that cause most anxiety to veterinary officials, such as foot-and-mouth disease, cattle plague and contagious bovine pleuro-pneumonia, was found within our borders.

Diseases that do exist to a very limited extent, such as glanders, hog cholera, and cattle mange, the report shows are being kept well under control and are diminishing in number year by year.

Glanders is proven to have existed only in Northern Saskatchewan and Manitoba and in those provinces even these cases are reported. All the outbreaks have been controlled by the Veterinary Department.

"The disease becomes known as 'Bacillus Fodder' when it is found in cattle, and when it is found in hogs it is called 'Bacillus Fodder' with a capital 'F' because it was blinded by a German shell which exploded half way down his face, invalided him to his home in Lapachelle Ville Forest in the department of Nord, France, where he had to work with earth before becoming fit enough to set up his flat cars that have been built to fit him. Then he goes out to fields to stand there until the cattle empty them. Then they are returned to the sites and the hay barns are refilled, then the engine is run again, hauled by the dead locomotive, to stand in front of the factory for the accommodation of the hungry cattle."

The engine is run alongside the pens at the rate of one mile an hour and the feed put into the troughs without stopping the train. A team of horses and a horse running to the troughs in the pens. A system of paddles in motion keeps the feed stirred so that some of the hogs don't get fat while others are getting the lean."

Prominent Railway Official

Charles Murphy, General Manager, Canadian Pacific Railway Company, Western Lines.

Blind Soldier May Become Famous

Work of Untrained Artist Wins Prize in Paris Salon.

Exhibit No. 3514 at the salon of French artists in the Grand Palais is a small statue of a French pilot leaning on a gun. It was selected from over 1,000 entries in competition for a place in the salon, and the award to Fodder was made by judges who had no knowledge of the sculptor.

The sculptor becomes known as "Bacillus Fodder" with a capital 'F' because it was blinded by a German shell which exploded half way down his face, invalided him to his home in Lapachelle Ville Forest in the department of Nord, France, where he had to work with earth before becoming fit enough to set up his flat cars that have been built to fit him. Good Coal In Upper Skeena Field

Will Be Used to Increase Power in Trial in Far East.

More than 100,000 tons of nitrate, originally produced to help in blinding the German armies off the map of Belgium and France, this year will be put to the more peaceful work of increasing the output of the United States farming soil.

After the signing of the Treaty of Versailles, the United States Department of Agriculture, 10,000 tons of nitrate were sent to a salvager in Chile.

To this quantity was added 40,000 tons received from Chile by the Department of Agriculture, too late for distribution last year, so that 151,000 tons will be sold by the Department of Agriculture to farmers under the authority of the Food Control Act, which provided for its purchase and sale by the government to farmers at cost.

More Canteen Money For Dominion

Canada's Share to be About Two Millions.

The report of the British parliamentary commission which investigated the disposition of army canteen funds has been completed and now is being forwarded to the Army Council.

Although no return is forthcoming, it is probable that Canada, which has already received over a million dollars from the funds, will obtain a further sum in the neighborhood of twice that amount.

Germany Cannot Enter League

France and Britain Are Both Opposed.

There is not the slightest possibility of Germany being admitted to the League of Nations in the near future—certainly not as things stand at present," says Sir Edward Grey, Foreign Minister of Great Britain.

He said, "The British official point of view is unalterably opposed to the idea, and Great Britain has not the slightest inclination to depart from the French view-

point of view. The French official point of view is unalterably opposed to the idea, and Great Britain has not the slightest inclination to depart from the French view-

Distress In The Throat Caused Great Anxiety

Not an uncommon experience was that of Mrs. S. Wilmot of Shuler, N.S.: "Many remedies failed, still I suffered greatly from 'Catarhozeone'." I have been a most dreadful sufferer from Bronchial Catarhozeone. I would hawk and suffer great distress in my throat. I used all kinds of remedies, but found no relief till I had Catarhozeone. It strengthened my throat, stopped my hawking, and relieved me. Catarhozeone yourself, see what wonders it works on a bad throat. Different from the old way, because you breathe Catarhozeone. Great results. It cures the inflamed throat and lasts two months. Small size. Dealer, The Catarhozeone Co., Montreal.

Far Away Green Fields

By E. L.

Elizabeth had a hard day. It had been dismal and cold and the furnace had been given up, and as she looked disconsolately out at the snow-clad prairie, stretching away to the horizon, she made her mind, as women sometimes will, that she and the babies had better seek a warmer climate. This was the state of living in a place, quite to herself, where it was so cold and miserable for such a great part of the year and where the women and children were compelled necessarily to go up in the world. They had to hate their aggravation; they had to spend so much money on coal. No wonder, she thought, that so many people left this God-for-saken spot and went away to British Columbia or the Southern States where in the sun and the flowers it must be sunny white.

And while she undressed the babies, she still called them the babies, although Harold was now Winifred nearly four, ways and means of getting out of the cold prairie had come to her mind. Of course she knew she would miss her old friends, but then thought she, other people moved and they had to leave their old homes and settled quite easily. Elizabeth had not yet done this, but did not take into consideration the fact that her old ways and her old associations more than most people and forgot that the prettiest scene in the world was also the most desolate and dreary one could contemplate, it surrounded by those she loved. No, like so many people who are guided mainly by impulse she did not go into the details at all. She decided that she hated the place and had enough trouble here and that she could live where it was softer, more pleasant and beautiful. By the time she had kissed the babies "good-night" she had mentally persuaded her husband to give up his position and home and family. She was sitting on the train with the children bound for the sunny south.

As luck would have it John came home from the office somewhat dispirited. Everything had gone wrong there on that blitter cold day; there had been misunderstandings

SUFFERING OF YOUNG WOMEN

This Letter Tells How It May be Overcome—All Mothers Interested.

Toronto, Ont.—"I have suffered alone. I was a school girl with pain in my left side, which increased, becoming cramp-like, growing worse and worse, until I could hardly stand. I was so ill that I had to give up school. I tried several doctors and patent medicines, but was only relieved for a short time. Some doctors wanted to perform operations, but Dr. Goodman said I should immediately seek restoration to health by taking Lydia E. Pinkham's Vegetable Compound. Those who need special advice may write to Lydia E. Pinkham Medicine Co. (Confidential). Lydia, Mrs. Goodman will be opened, read and answered by a woman and held in strict confidence."

W. N. U. 1372

with the office force, a scene with the boss, and an aggravating story of conscientious and unappreciated effort, so that when Elizabeth unfolded her plan to him of getting out and helping themselves away to a place which she began to paint as a very suitable Utica, he said: "All right, I'll put the house in Green's hands tomorrow for sale and if we get our price, we'll get out. I'll write to some firms where I might get a job and tell 'em sucker," meaning his boss' to get someone else to handle his old job."

All worked like a charm. They were able to sell their house at a splendid figure, more than they had expected, and when they were rejoicing over this piece of good fortune John received a very pleasing reply to one of his letters of application, offering him a good position in a small town in one of the southern states. Elizabeth was overjoyed, even when they sold their furniture hardly felt a qualm, so pleased did she imagine she was to get away from the snow and cold of the prairies. It was a week before her mother began to look bad and when her mother shook her head sorrowfully that she felt another remorse, but she tried to cheer her mother up by saying: "Well, mother, if it's not there, perhaps you could come with us. The old lady shook her head and remained silent.

I am getting too old to transplant now. Elizabeth, I came to this prairie country many and many a year ago from old Scotland which is beautiful enough, ye know, but I have given up the idea of ever going back again. The wonder of the prairie winds its golden grain in the summer after its travail of the winter months, and we have prospered here. Na, na, I would rather be here than anywhere again. The prairie is all her husband has been friend to me and mine, and I think I'll be buried here."

Elizabeth knew the story of her parents' immigration to the prairie country, how they had come with nothing but the clothes on their backs and had started all over again. They had worked hard and had saved, and she had seen that there had seemed little reward for their efforts, but at last they had gained comfort and a real competence in their later years, so for a moment Elizabeth could not help but feel sorry for the widow of her plan and then she remembered a picture of the beautiful country to which they were going, which had been sent to her by Harold. And Winnie, grandmother, had planted the flowers and the roses, the same area would suffer a like fate.

their eyes at Elizabeth and he read it in her face that they would be only too glad to have him back, and promised him an advancement in the very near future, and hinted, wisely, too, that for a young man there were no better opportunities than the prairie country.

And six months from the time they left the little town they returned. They had spent a great deal of money and the babies had suffered much, but Elizabeth had learned a valuable and profitable lesson regarding distant green fields which seem so beautiful in most of our lives, at some time or other, and which prove merely a mirage after all.

They settled down to make the best of their lives on the prairie, with its cold, its snow and its hardness, for they had found that there were sufficient compensations to them to make up for the whole of the sunny southland.

Plants Generate Electricity

Will Solve Light Problem If It Could Be Used.

All living plants generate electricity and when die they discharge it into the air. If science could only devise some plan for capturing this energy and harnessing it to the use of man, the problem of light and power would be solved for all time; for countless millions of plants are constantly dying all over the world, and releasing an immense amount of energy. The question arises, shall we let it be wasted for all the trees in a forest to die at exactly the same moment a terrible catastrophe would be the result. Every body living within a radius of many miles would be instantly electrocuted, and all animals and birds in the same area would suffer a like fate.

France Has
Currency Problem

Experimental Issues of Paper Money Proved Failure.

France is facing a serious problem in supplying a currency to the place of the silver exchange, which appears like magic in the country. Experimental issues of paper money in small denominations have not met the problem and have resulted only in general exasperation.

The paper currency becomes ragged, and the Government decided to replace it by aluminum coins. It requires small money to the value of 100,000,000 francs to meet the requirements of francs, however, and the mint has a maximum capacity of 100,000,000 francs per year.

Summer Storage of Coal.

On the subject of storage of domestic coal during the summer it has been usual in England where coal was stored without shelter, that a winter's supply would be lost in the heat of the pile, and a coat of whitewash applied over all; and that this had the effect of preserving the coal from the action of the weather.—Edmonton Bulletin.

The patriotic man is loyal to his country and to the community in which he lives. If he is consistent he will give first preference to Canadian-made goods when making purchases. He will also stand loyally by his local dealer.

Good Price For Bullets.

At the annual sale held at Edmonton this spring thirty-one Herefords, including calves from ten to eighteen months old brought an average price of \$245 per head.

Jealousy bears a lot of fruit that should not be preserved.

Your Teeth

By Rev. Proctor McGee, M.D.,
D.D.S., Editor of Oral Hygiene.

THE THIRD HAND.
Copyright, 1921, by Rev. Proctor McGee.

It is very unusual to see a couple of foreigners, or even home folks sometimes, waving and gesturing wildly with their hands in a normal conversation.

We do not consider it is it is the hands that talk, but the mouth which does a little of the month's work occasionally; the mouth certainly does enough work that belongs to it.

From the earliest infancy to utter old age we use the mouth as an amateur workshop, testing laboratory, carriage, thread-cutter, pencil-sharpening, lubricator, wrench, vice, weapon of offense and defense—and for many other uses in addition to its proper work.

In fact the mouth is commonly used as a third hand.

This means an enormous amount of time is wasted upon the teeth, gums and jaws—that does not come from chewing alone.

Almost everything that is put into the mouth has infection of some kind upon it.

The very fact that we suffer so little from this overuse of the mouth shows that the salvia must be a germ killer to a very considerable extent but the salvia does not always prevent the infection from these outside sources.

Many very serious conditions arise from the "third hand" use of the mouth. In addition to infections, irritation, ulcers, etc., the teeth often break the enamel and frequently break off whole teeth, fillings are loosened, decay is encouraged and the tooth is liable to become sensitive.

Current loans and discounts stand at \$109,183,000, as against \$119,000,

the new stock to the rest account, now stands at \$9,450,000.

"The new stock to the bank now number 2,997, as against 2,622 in 1920, being an increase of 375 during the year.

Current loans and discounts stand at \$109,183,000, as against \$119,000,

the new stock to the rest account,

now stands at \$9,450,000.

There are indications that this bank continues to extend its ample share of assistance to the industry.

The habit of biting fingers instead of cutting them causes a chronic inflammation of the membrane that covers the roots of the teeth and will shorten the life of the teeth. It is much more comfortable and cheaper—to buy scissors.

In fact the value of the mouth is so great that it is poor economy to abuse it.

An Englishman's View

LONDON BANKERS SAY AMERICA IS A PARADISE COMPARED WITH ENGLAND

To those who are disposed to take a gloomy view of conditions in this country may be commended the views expressed in the New York Times, by Ernest J. P. Benn, a London publisher, recent visitor. To him America seems a paradise while England, a paradise. "I wish," said he, "I had come here twenty years ago. It would have made me a better man."

"You are poor, poverty because you have no inefficiency. If any of you are poor, you don't wallow in it; you have the determination to beat it and get up. Because there is no inefficiency and no poverty and no hopelessness, there is no despair.

Our rags rampage as it is in England, where our Labor party numbers 10,000,000 people and have inflicted half the population with the ambition to destroy capitalism. There is no political corruption in America. Our ideologies will ever rock here, as it has all over Europe since the war because there is no soil in which it can grow. This is an industrial El Dorado."—Indianapolis News.

A Growing Bargain

Clever English Woman Got Ahead of Market Gardener.

Some of the most enterprising girls at least on living and haggling driving as the Scotch. Take the following case:

"You can't beat my old woman at getting the most for her money," said one Englishman. "She went to a market gardener and insisted on getting the best quality of vegetables. 'How much for this one?' she says. 'Eight pence,' says he. 'Too much,' she says. 'What's the price of this little unit?' 'Four pence.' 'Are right, I'll have it,' and she pays for it on the spot." Then she says, 'But don't cut it now, I'll call for it next week.'—Boston Transcript.

West Africans And Dictionary.

The "educated" West African negro rivals the Babu in the artless of misusing English polysyllables. As he appears also to nourish get-rich-quick ideas, he bombards firms whose names are well known with proposals to do big business. A Manchester man who collects these epistles has just received one which winds up with "trusting you are in the same homogeneous category, yours equitably, T. E. Atkins.—From the Manchester Guardian.

Merchants Bank Officials Express Tempered Optimism Regarding Business Situation

President and General Manager Review the Canadian Business Situation With Much Hope--Financial Position of the Bank an Exceptionally Strong One--Crop Outlook Encouraging.

At the annual meeting of the Merchants Bank of Canada, the various reports which were presented showed that this institution occupies a commanding position in Canadian financial affairs. The addresses of the President, Sir Montagu Allan in part said: "The general depression in business, felt in every country in the world, affects every country in the world, has affected the business of the bank to some extent. The effects of depression have passed, and that will soon be a change for the better. The trend of business is encouraging, and there is no doubt result in the loss of a great deal of trade, and the unemployment rate will be reduced." The trend of business is encouraging, and there is no doubt result in the loss of a great deal of trade, and the unemployment rate will be reduced.

The trend of our interest-bearing deposits for the same period has been steadily upward, an increase in that of late of over 100 per cent, which will no doubt result in the loss of a great deal of trade, and the unemployment rate will be reduced.

published.

Mr. Thomas Burnham, who came from Seelye, Montana, about a month ago, after a trip through Western Canada, is now visiting his brother Mr. D. W. Burnham of Burdett, and does not think of returning home yet. He was working for a time in the steam outfit of Mr. Holm, south of Grassy Lake.

Don't let the Gophers get what is left of your crops, Gophericide is sure death to gophers. E.M. Johnston has a large stock of Gophericide as well as other gopher poisons.
